Section 2

Hazard Identification

Classification of the chemical in accordance with paragraph (d) of §1910.1200;

Steps to Take in Case Material Is	
Released or Spilled:	

Exposure to the spilled material may be severely irritating or toxic. Follow personal protective equipment recommendations found in Section 8 of this SDS. Personal protective equipment needs must be evaluated based on information provided on this sheet and the special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred, and the expertise of employees in the area responding to the spill. Never exceed any occupational exposure limits.

Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section 8 at a minimum. Dike with suitable absorbent material like granulated clay. Gather and store in a sealed container pending a waste disposal evaluation. Contain spilled liquid with sand or earth. DO NOT use combustible materials such as sawdust. Use appropriate personal protective equipment as stated in Section 8 of this SDS. Advise the Environmental Protection Agency (EPA) and appropriate state agencies, if required. Absorb spill with inert material (e.g., dry sand or earth), then place in a chemical waste container. Vacuum or sweep up material and place in a disposal container.

Section 7

Handling and Storage

Handling: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe dust/fume/gas/mist/vapors/spray. Wash thoroughly after handling. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection. Use personal protective equipment as required. Store locked up. Keep container tightly closed in a cool, well-ventilated place. Store in corrosive resistant container. Storage:

White - Corrosive. Separate acids from bases; separate oxidizer acids from organic acids. Storage Code:

Ecological Data

Overview: Mobility: Persistence:	Moderate ecological hazard. This product may be dangerous to plants and/or wildlife. This material is expected to have high mobility in soil. It absorbs weakly to most soil types. Biodegradation, adsorption to sediment, and bioconcentration to aquatic organisms should not be significant.			
Bioaccumulation:	Bioconcentration is not expected to occur.			
Degradability:	Does not biodegrade readily.			
Other Adverse Effects:	No data

Disposal Information

Disposal Methods:

Waste Disposal Code(s):

Dispose in accordance with all applicable Federal, State and Local regulations. Always contact a permitted waste disposer (TSD) to assure compliance. If discarded, this product is considered a RCRA corrosive waste, D002.
